

# A Combination You Can Trust.

The new Fire Innovations NFPA belt with the DEUS™ 3100 vertical rescue system provides a complete, on-call rescue solution.

Fire Innovations™ presents a new version of its popular Colorado NFPA firefighter belt designed specifically to integrate with the DEUS™ 3100 Individual Vertical Rescue for Fire Professionals. Together, you get a complete emergency rescue solution that's ready to go when you need it, out of the way when you don't.

All Fire Innovations' Colorado firefighter personal escape/ladder belts are constructed of two layers of heat-resistant Kevlar® webbing and NFPA-rated buckles. The special DEUS Rescue design includes three special pouches. One on the right is made just for the DEUS™ 3100 vertical rescue system, pre-rigged and instantly ready, along with a carabiner or small anchor. A pouch on the back holds 50 ft of DEUS Fire Rope. And a pouch on the left holds a detachable strap that can be used as an NFPA ladder strap, a sling, a lifting strap or a one-legged harness. What you need, right where you need it.

When lives are on the line, trust DEUS Rescue.
